CROWN POINT SOON TO BECOME ACTIVE

Things in Shape to Resume Strengous Pursuit of Its Deposits-To Decide on Equipment.

Crown Point, embracing nearly a dozen claims in what may be called the very heart of the active Tintic disargy of the past and give an account of Itself "worthy of its metal." Some time ago the directors of the compan notified General Manager John Roundy of Provo, to get things in shape for active work on the property in the near future. Now the only matter to be decided before active work begins is kind of power plant to be installed at the 400 shaft, with the indications at the 400 shaft, with the indications that electric power machinery will be selected, but this point remains for the directors to determine. Equipment of sufficient capacity to continue the shaft to depth will be put in after which Crown Point will be the scene of steady development work. The shaft will be continued down and the 400 drift from the 400-foot level probably be carried toward the contact, where values are expected to be encountered betwen the lime and the porphyry, according to Director Joseph Wirthlin of Salt Lake, who has just returned from Eureka where he owns a merchandise store. Crown Point joins Colorado and Iron Blossom on the west, and embraces some of the most promising unprospected territory in the entire Tintles.

KNIGHT STOCKS FIRM. Prices Declined During Morning Call

On 'Change, Prices were rather on the decline o Prices were rather on the decline on the exchange during the morning call. The Knight stocks, particularly the Colorado and Iron Hlossom, held firm, however. Nevada Hills declined to \$1.85. The value of business was just fair, aggregating about \$6,000.

ACTIVE IN BEAVER. Lorin N. Morrison has returned from Beaver county, where he saw considerable rich ore from the Commonwealth Mining company's property. Ore running 200 ounces silver and better was not considered unusual there. "I never saw as much work all over the county of Beaver as one can now witness by making a flying trip through the districts," he said. "I heard while at Milford that the Red Warrior company is turning up some copper values Milford that the Red Warrior com-pany is turning up some copper values at depth, but I cannot vouch for this. But on all sides you hear enough to convince a person that the work at depth is not only bringing fine results to the light in so many directions, but everything premises splendidly for the future of mining operations down there. Beaver county certainly is making good."

KIMBERLY THE BIGGEST.

That Kimberly, Nev., is one of "the biggest gold mining propositions" he ever knew, is the opinion of J. W. Thorman, formerly of California and Colorado, where he has been largely interested in mines for years, according to the Kimberly News. "One can get pannings anywhere—gold that lies in the bottom of the pan in coarse pleces. The Hilltop, Independence and Golden Rule groups were a special attraction to me, and I had to come to Kimberly to see one of the largest gold mines in America. On the Gold Bond group, at an elevation of 8,000 feet, I found a great dike of ore outcropping for several thousand feet carrying values 4½ feet wide across its width."

AT SHAVER ISLAND COLN.

Working to Tap at Depth Rich Deposits.

Deposits.

Recent word from the property of the Silver Island Coalition Mines company in western Tooele county is that the recently installed compressor plant is working satisfactorily and good progress is being made along the tunnel that is being driven forward to tap at depth the rich surface veins which produced in the past year and a half \$26,000 hm high grade ore. Another small shipment of the rich ore is now ready for loading on the cars. The only kind of ore sent from the Silver Island is the highest grade, which runs close to \$150 a ton in gold, silver, lead and copper. Some of this shows values as high as 200 ounces silver. Most of this rich ore is from simple fissures, or off-shoots from the main veins, which the long tunnel will open up at considerable depth. During the past year and a half the Silver Island has yielded its owners considerably more money than they have put into developments, from eight to ten cars, averaging close to \$3,000 to the

car.

Near the Silver Island is the Old Glory property, which it is said was recently leased to parties who have the capital to bring this promising ground to the front in the near future, with prospects favorable for another shipper in the Silver Island district, which counts many good properties where a little judicious development work will bring quantities of pay ore within the reach

CONCENTRATES.

The Florence Goldfield has a nominal output of 150 daily of high grade ore. The main Florence shaft is now down

A recent clean-up from the Boston Sunshine mill at Mercur gave values of \$2,200, according to Supt. Pool of the Consolidated Mercur Gold Mines com-

The in-flow water into the 110-foot pit in Copper Flat, Ely, Nev., is giving some trouble, but in spite of it hundreds of carloads of ore are going out every week, 187 cars having been shipped out the day following the recent great water flow into the pit.

The Laurel Gold Mining, Milling and Leasing company recently shipped 378 sacks containing 40,000 pounds of high grade ore to the U. S. Smelting & Refining company. The ore came from the property eight miles west of Winnemucca. A deep shaft is being sunk on the property.

The Giroux company, according to one of its directors, has nearly \$1,000,000 cash on hand, and has mapped out and is making a vast amount of improvements and developments of its great property. The principal owners are closely affiliated with the Amalgamated and Cole-Ryan interests.

The Daly-Judge property at Park City will have its new electrical equip-nent in readiness for operation about July 15, according to Gen. Manager G. July 15, according to Gan. Many fro W. Lambourne, who came down fro the Park recently. The improve the Park recently. The improved machinery will result in considerable of a saving in the handling of ores.

Rumor has it that the owners of the Kimor has it that the owners of the King William property at Tintle are about to inaugurate development work on a scale commensurate with the worth of that old property, which is sur-rounded by some of the greatest mines in the district, and has been worked near the 2,000-level from the Eagle & Rius Bell mine. Blue Bell mine.

F. M. Taylor, a prominent mining man of Denver, Colo., formerly of the Taylor-Brunton company of this city, is in Salt Lake, visiting with Manager Arthur O. Gates of the Utah Ore Sampling company. Mr. Taylor is returning home after a trip to the coast, He disposed of most of his interests in this state before moving to Denver.

Next week the Consolidated Mines company of Goldfield expects to start up its 100-ton stamp mill and handle 850 tons of ore a day. The hoist has a capacity of 1,000 tons every 24 hours. The results of the great April fire can barely be seen, the work of improvement having practically swept away all signs of the disastrous conflagation.

Mining and smelting operations in the vicinity of Morningstar. Nev., are attracting many miners to that section of the state, near where the Nevada Douglas property is situated. The work on the Nevada Copper Belt railroad to the mines is progressing rapidly, and when it is open for business a great influx into the Yerington district is anticipated.

A contract for an extension of 100 feet to the 700-foot tunnel on the Greenhorn Mining company property at Marysvale has just been let, and good results are looked for. This tunnel is paralleling a diorite dike and in its progress cut through several

minor ore fissures. Near the Green-horn is the Shamrock, which is right now shipping considerable rich ore.

The 550-shaft on the Victoria mine at The 550-shaft on the Victoria mine at Tintic is being timbered with the object of continuing it down to the 1,000-foot level. The ores from this dividend payer heretofore have been taken out through the Grand Central workings, but when the improvements now in progress on the Victoria have been accomplished, the mine will handle its own ores.

After having inspected the Bingham After having inspected the Bingham Copper company, of which company he is a director, Carl Brandt of Boston has started home, going via Yellowstone, accompanied by H. U. Hart, Mr. Brandt expects to see Salt Lake some day become one of the greatest centers of wealth in the United States, principally through the many great mines in its immediate vicinity.

in its immediate vicinity.

Work at the Columbus Consolidated is moving along smoothly, according to Manager Tony Jacobson, who says the mine is now employing a force of about 50 men, and shipping ore that runs near 330 to the ton. Some days as high as 50 tons of good ore are being sent to the mill, varying from day to day both in the amount and in the values, but all in all the mine is in good condition and is making a very satisfactory record in the way of its weekly shipments.

Over on Connor Creek mining district considerable life has lately been infused into the camp, according to the Burley, Ida., Times. A number of experienced men are now in the camp. experienced men are now in the camp, and much encouraging news 4s coming out of there. A shipment of \$50 ore is promised from the East Star group soon. A new ore body on the Alice has just given up 30 tons rich in gold, sliver and lead. Many years ago rich ore was taken from near Connor Creek and hauled to Salt Lake.

and hauled to Salt Lake.

The Boston News Bureau says: Lake has proved its lode for a length of 1,300 feet, measuring from the extreme end of the south drift at the second level northward to the extremity of the north drift at the third level; and to a depth of 750 feet, measuring down square on the lode from the surface to the sixth level. Taking a width of 50 feet as before gives 48,750,000 cubic feet or 4.062,500 tons of rock which may be called "probable tonnage," This compares with an estimate in November 1909, of 2,187,000 tons.

Many leases are operating in the

Many leases are operating in the Goldneid district and at widely sep-arated localities. The annex shaft on the Poleverde diaim of the Jumbo the Poleverde daim of the Jumbo Extension is being farther sunk from the 800 to the 1,100-foot level, the ore having pinched on the former level. The Grizzly Bear is developing on the 1,170 level, from its 1,200-foot shaft and seeking the Mohawk or Clermont ore shoot. Seven leases are developing actively on the Atlanta at various depths to 730 feet, with an encouraging showing at several points. Three ing showing at several points. Three leases are getting some ore on the Diamondfield Black Butte, and several others have made paying shipments.

The Seven Troughs Lookout Mining The Seven Troughs Lockout Mining company, according to The Miner, has opened four distinct ledges, all panning from a few dollars up to \$40. One of the veins opened in a shallow winze from the tunnel driven on the vein, shows sulphides which are identical in character and appearance with the Regan ore which carries the highest values. Just west of this in another tunnel a second vein shows values, while between that and the Aquilas, the only ground lying between the the only ground lying between the Lookout property and the Mazuma. Hills, two promising veins have been opened in trenches on the surface. That these veins are not stringers from a single vein, is evidenced by the fact that in each instance the vein lies alongside the black dike which is so characteristic of the district.

New Incorporations

Coveville Water Works company is the name of a new company of Cove-ville, Cache county, which filed articles of incorporation with the secretary of state this morning. The capital is \$5,600, divided into shares of \$200 each. sa,600, divided into shares or \$200 each. Elias S. Larsen is president, Joseph S. Allen, vice president, Fred Titensor, secretary and treasurer. These are also the directors. The object of the company is to furnish a waterworks system for the neighborhood of Coverille.

The Bloomington Canal company Bloomington, Washington county, filed articles of incorporation in the secretary of state's office this morning.

The capital is \$3,800 divided into shares of the par value of \$20 each. Lars J. Larson is president, Alfred A. Carpenter, secretary and treasurer, and John M. Larson, Nephi Fawcett, John A. Stringham and Wallace Blake additional directors.

The Western Real Efate and Securities company of Fort Duchesne, Utah, filed its articles of incorporation with the secretary of state this morning. Its capital is \$25,000 divided into shares of \$100 each. C. F. Horn is president, J. F. Halderman, vice president, R. C. Horn, secretary, L. R.Reifsnider, treasurer, and T. W. O'Donnell additional director.

The Green River Orchard company of Colorado filed its articles of incorporation with the secretary of state this morning designating E. A. Bricker of Emery county as its state agent. Its capital is \$20,000 and William R. Echternach is president and H. R. Smith secretary. Smith secretary.

PERSONALS.

George S. Beil has recovered from an attack of asthma, and is able to attend to his business as before.

Fish Commissioner F. W. Chambers has returned from an official trip to Panguitch where he looked after the building of the new state fish hatch-

Clarence E. Allen, Jr., of this city, has returned home from Yale, where he has just completed successfully his freshman year.

A. A. Sweet, vice president of the Utah Southern road, is reported from Long Beach, Cal., as slightly improved. He is suffering from Bright's disease. Cashier T. W. Boyer of the Continen-tal National bank has gone to Wyom-ing on banking business.

Mr. and Mrs. Paul Rainey will leave later in the week for the Isle of Pines in the Carribean sea, to locate on a fruit ranch

Mr. and Mrs. W. C. Hunter left to-day on an extended trip through the east. Mr. Hunter will speak at the insurance convention to be Kansas City on the 29th inst. be held in

Atty, J. M. Hamilton left this morning for Buffalo, N. Y., on legal business. He will visit, en route, his former home at Ft. Madison, Ia. Mrs. C. F. Bray and Miss Alice Mc-Coy have returned from a two months visit in the east.

Samuel H. Smith, of Newton, Kas... in the city to attend the funeral of is brother, M. B. Smith. S. F. Halversen, Ogden representa-tive of the Bamberger railroad, is in Sait Lake on business.

VERY WEAK TONE

New York. June 27 .- The stock market developed a very weak tone today, the explanation not being obvious in any of butter today. J. M. Christensen

dropped his price one cent wholesale, to 32 cents, and Market row also came down on the retail price to 35 cents. But this arrangement does not appear to have been lasting, as early this afternoon it was given out that the Jensen Creamery company refused to stand for it, so the price was sent skyward again. There is much complaint because of the high price of butter. ricipone Morgan had died suddenly or Arr. alorgar, at the other causey it to be essuated that bear activities were respon-tion to the arrange of prices alors assupention was scancing when the

Rei give rise to di recinig di dressa that some bath he've was movering over the matter waren het not become known.

The more mattere opened cours who mitte inverest matness cand prices showing but sagne courings from the Satutua, cooling. A sangang telluency was mainiested, St. Path decining & Active selling caused a severe decine in which the principal stooks were freely liquidated tending broke 3% and union Pacine 2%. United States Sued 2 and 3t. Path. Northern Pacific, Atchison, Amalgamated Copper, Southern Pacific, Chesapease & Onio, american Smelding, National Lead and consolidated Gas 1% to 1%. The Northwest wheat situation was assigned as the cause of the weakness.

The Source of the motives of the selling of stocks were clearly defined. Prompt cannot or a rumor of J. Per son Morgan's sudden death brought relief to the depression Northern Pacific lost 2%. Consolidated Gas 2%. Great Northern preferred and American Hide and Leather preferred 2 and Chesapease & Onio, New York Central, North American and Laciele Gas 1½ to 1½.

Bonds were easy.

Stocks continued to come out on the market in sufficient volume to break prices severely, although there was the usual sharp contraction in the volume of the midday business, western railroad stocks were the weakest features at this time. Union Pacific and Reading receded 3%. St. Paul 3, Southern Pacific. 2% and American Smelting and United States Steel 2%, the latter selling down to Significant for the active stocks had added to their losses considerably. Consolidated Gas was off 3% cents, Atchison, Chesapeake & Ohio and Kansas & Texas 3, and Rock Island preferred and Great Northern Ore Certificates 2%.

The market closed weak at the lowest. Prices sunk away again, touching a lower level than before. Union Pacific and Chesapeake & Ohio and Kansas & Texas 3, and Rock Island preferred and Great Northern Ore Certificates 2%.

PRODUCE.

CHICAGO. Chicago, June 27.—Another day of drouth and indications of more to follow in the spring crop country shoved wheat prices up today not withstanding an advance of 7½ cents a bushel last week. Expected further deterioration in the parched grain fields was the important factor. The market here was directly affected also by a rise of 2½ cents this morning at Winnipeg, presumably due in turn to heat over the Canadian northwest.

rected also by a rise of 2½ cents this morning at Winnipeg, presumably due in turn to heat over the Canadian northwest.

Firmness of European markets cut a figure also as cable dispatches mentioned that the outlook for the American spring wheat crop was causing nervousness among foreign short sellers. The opening, here was a shade to ½ 21 up with September covering the extreme range at 35½ to 995%. After a while the market steadled around 39½.

The country flooded the market with corn today. One broker alone turned away 100.000 bushels. General realizing seemed to be in order because of rains benefiting the crop. There was good commission buying, however, because of the bulge in wheat. September started ½ to 1½ off at 59½ to 60½ and came to a temporary stand at 60½.

Seiling of oats was on a large scale by local traders and those outside as well. Better crop prospects and the weakness of corn were leading reasons. September opened ½ 4½ to 1½ 21½ lower at 33½ to 39. A resting place was found at 33½.

With hog prices lower and the decline

september opened 154% to 18 21% lower at 384. to 32 A resting place was found at 384.

With hog prices lower and the decline in corn, provisions eased off somewhat and showed little reaction.

First quotations for the September option were 22.45 for pork, 12.35 for lard and 12.46 to 12.42½ for ribs.

Wheat—Heavy selling to take profits wiped out all the advance but bullish advices from North Dakota and steady buying caused a raily and the close was strong, with September at 1.00%, a net advance of 13.671%.

Corn—Between wheat strength on the one hand and favorable crop news on the other the corn market much of the time was stationary. The close was easy, with September showing a net loss of a at 60%.

All permits cancelled after July 18th 1910.

By order of the Board.
D. J. WATTS, Sec.

NOTICE TO CONTRACTORS.

Lemons are still in the ascendant, on account of the strong demand in the east on account of the protracted hot weather. There are no more strawberries, and the raspberries are beginning to weaken. There threatens to be a shortage ere long all 'round in Utah fruit products on account of the drouth which has now lasted since the 5th of May. Tomatoes are on hand from Texas, the first car of unwrapt that have been received this year. There is also a car of new potatoes from Sacramento, a car of dry onlons from Stockton, and cantaloupes from Indio. The farmers still continue to congregate at the Continental stalls, not withstanding the dictum of the city council, to the inconvenience of the commission men on Eccles street.

The quotations obtaining today, are as follows: Bids will be received by the DAVIS & WEBER COUNTIES CANAL CO. for concrete work on its canal according to plans and specifications which may be seen at the office of said company. Room Life. First National Bank Bidg. Orden. Utah. The work consists of links the company's canal with concrete for a distance of about seven and one-half miles in tength. Bids to be made for any part of this work not less than one-half mile. Separate bids will be received for exavating and preparing the canal for the concrete.

All bids must be in the hands of the secretary of the company not later than 10 o'clock a.m., July &th., 1900.

The company reserves the right to reject any or all bids.

THE DAVIS & WEBER COUNTIES CANAL CO.

Going to Alaska-Prof. W. A. zell is in Seattle, waiting for Wetzell, who left this afternoon Weizell, who left this afternoon for Los Angeles, intending to travel thence north to Portland and Seattle. She will be joined at Portland by her sis-ter, Shannah Cumming, and the three will then indulge in a trip to Alaska, to be absent until Sept. 1.

Their marriage over a year ago, was the outcome of a San Francisco earth-

Funeral of Wm. Jarvis-The funeral Funeral of Wm. Jarvis—The funeral of William Jarvis was largely attended Sunday in the Emerson, ward with interment at City cenetery. Bishop George Arbuckie presided. Those who paid tributes to the character of Mr. Jarvis were: Bishop Lindsay of Taylorsville, Bishop Parry of the Sixteenth ward, and Bishop Christensen of the Tenth ward. Solos were rendered by Miss Hattie Anstee and Miss Lillian Bird.

Labor Day Plans—The building trades council organized a labor day comminttee Sunday, with Thomas Watkins chairman, and John Osborn scorptary. The committee issued in the county of the watkins chairman, and John Osborn sceretary. The committee issued invitations to the various unions affiliated with the Federation of Labor and the building trades council to send delegates to act on a general committee. The building trades council is uniting this year with the Federation of Labor in the celebration.

Work on Federal Building—Post-master A. L. Thomas has received word from Senator Sutherland to the effect that work on the addition to the Federal building in Salt Lake will be started by Sept. 1. The supervising architect of the treasury is now work-ing on the plans, and will have them ready for the compensation of work ready for the commencement of work on Sept. 1. The original bill for the addition to the Salt Lake Federal building called for \$175,000, but Sen-ator Sutherland's amendment author-ized the expenditure of \$30,000 more, making a total cost of \$205,000.

Investigating Claims—John Stansbury, United States attorney at Washington, D. C., who spends most of his time investigating claims against the government growing out of Indian depredations, has returned to Salt Lake from the Jackson Hole country, where he went to examine witnesses Lake from the Jackson Hole country, where he went to examine witnesses in two claims. While in the Jackson hole country Mr. Sansbury looked into the claims of a man named Spaulding, who sileged depredations at the hands of the Brule Indians, and the claims of Stanley P. Davis, whose heirs filed claims for damages at the hands of the Ute Indians of Uintah. The investigations made by Mr. Stansbury are reported to the department at Washington, where disposition of the claims is made,
